

BedDetails

A Schema.org Type

Thing > **Intangible** > **BedDetails**

[\[more...\]](#)

An entity holding detailed information about the available bed types, e.g. the quantity of twin beds for a hotel room. For the single case of just one bed of a certain type, you can use `bed` directly with a text. See also **BedType** (under development).

Property	Expected Type	Description
Properties from BedDetails		
numberOfBeds	Number	The quantity of the given bed type available in the HotelRoom, Suite, House, or Apartment.
typeOfBed	BedType or Text	The type of bed to which the BedDetail refers, i.e. the type of bed available in the quantity indicated by quantity.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of <code>rdf:type</code> in RDF. Text values can be used

Property	Expected Type	Description
		sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.

Property	Expected Type	Description
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **BedDetails** may appear as a value for the following properties

Property	On Types	Description
bed	Accommodation or HotelRoom or Suite	The type of bed or beds included in the accommodation. For the single case of just one bed of a certain type, you use bed directly with a text. If you want to indicate the quantity of a certain kind of bed, use an instance of BedDetails. For more detailed information, use the amenityFeature property.
