

BedType

A Schema.org Enumeration Type

Thing › **Intangible** › **Enumeration** › **QualitativeValue** › **BedType**

[\[more...\]](#)

A type of bed. This is used for indicating the bed or beds available in an accommodation.

Instances of **BedType** may appear as a value for the following properties

Property	On Types	Description
bed	Accommodation or HotelRoom or Suite	The type of bed or beds included in the accommodation. For the single case of just one bed of a certain type, you use bed directly with a text. If you want to indicate the quantity of a certain kind of bed, use an instance of BedDetails. For more detailed information, use the amenityFeature property.
typeOfBed	BedDetails	The type of bed to which the BedDetail refers, i.e. the type of bed available in the quantity indicated by quantity.
