| Property                            | Expected Type                          | Description                                                                                                                                                                                                                                |
|-------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Properties from <b>LoanOrCredit</b> |                                        |                                                                                                                                                                                                                                            |
| <b>amount</b>                       | <b>MonetaryAmount</b> or <b>Number</b> | The amount of money.                                                                                                                                                                                                                       |
| <b>currency</b>                     | <b>Text</b>                            | The currency in which the monetary amount is expressed.                                                                                                                                                                                    |
|                                     |                                        | Use standard formats: <b>ISO 4217 currency format</b> , e.g. "USD"; <b>Ticker symbol</b> for cryptocurrencies, e.g. "BTC"; well known names for <b>Local Exchange Trading Systems</b> (LETS) and other currency types, e.g. "Ithaca HOUR". |
| <b>gracePeriod</b>                  | <b>Duration</b>                        | The period of time after any due date that the borrower has to fulfil its obligations before a default (failure to pay) is deemed to have occurred.                                                                                        |
| <b>loanRepaymentForm</b>            | <b>RepaymentSpecification</b>          | A form of paying back money previously borrowed from a lender. Repayment usually takes the form of periodic payments that normally include part principal plus interest in each payment.                                                   |
| <b>loanTerm</b>                     | <b>QuantitativeValue</b>               | The duration of the loan or credit agreement.                                                                                                                                                                                              |
| <b>loanType</b>                     | <b>Text</b> or <b>URL</b>              | The type of a loan or credit.                                                                                                                                                                                                              |
| <b>recourseLoan</b>                 | <b>Boolean</b>                         | The only way you get the money back in the event of default is the security. Recourse is where you still have the opportunity to go back to the borrower for the rest of the money.                                                        |

| Property                                | Expected Type                                | Description                                                                                                                                                                                                                                                        |
|-----------------------------------------|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>renegotiableLoan</b>                 | <b>Boolean</b>                               | Whether the terms for payment of interest can be renegotiated during the life of the loan.                                                                                                                                                                         |
| <b>requiredCollateral</b>               | <b>Text</b> or<br><b>Thing</b>               | Assets required to secure loan or credit repayments. It may take form of third party pledge, goods, financial instruments (cash, securities, etc.)                                                                                                                 |
| Properties from <b>PaymentCard</b>      |                                              |                                                                                                                                                                                                                                                                    |
| <b>cashBack</b>                         | <b>Boolean</b> or<br><b>Number</b>           | A cardholder benefit that pays the cardholder a small percentage of their net expenditures.                                                                                                                                                                        |
| <b>contactlessPayment</b>               | <b>Boolean</b>                               | A secure method for consumers to purchase products or services via debit, credit or smartcards by using RFID or NFC technology.                                                                                                                                    |
| <b>floorLimit</b>                       | <b>MonetaryAmount</b>                        | A floor limit is the amount of money above which credit card transactions must be authorized.                                                                                                                                                                      |
| <b>monthlyMinimumRepaymentAmount</b>    | <b>MonetaryAmount</b> or<br><b>Number</b>    | The minimum payment is the lowest amount of money that one is required to pay on a credit card statement each month.                                                                                                                                               |
| Properties from <b>FinancialProduct</b> |                                              |                                                                                                                                                                                                                                                                    |
| <b>annualPercentageRate</b>             | <b>Number</b> or<br><b>QuantitativeValue</b> | The annual rate that is charged for borrowing (or made by investing), expressed as a single percentage number that represents the actual yearly cost of funds over the term of a loan. This includes any fees or additional costs associated with the transaction. |

| Property                               | Expected Type                                                               | Description                                                                                                                                |
|----------------------------------------|-----------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>feesAndCommissionsSpecification</b> | <b>Text</b> or <b>URL</b>                                                   | Description of fees, commissions, and other terms applied either to a class of financial product, or by a financial service organization.  |
| <b>interestRate</b>                    | <b>Number</b> or <b>QuantitativeValue</b>                                   | The interest rate, charged or paid, applicable to the financial product. Note: This is different from the calculated annualPercentageRate. |
| Properties from <b>Service</b>         |                                                                             |                                                                                                                                            |
| <b>aggregateRating</b>                 | <b>AggregateRating</b>                                                      | The overall rating, based on a collection of reviews or ratings, of the item.                                                              |
| <b>areaServed</b>                      | <b>AdministrativeArea</b> or <b>GeoShape</b> or <b>Place</b> or <b>Text</b> | The geographic area where a service or offered item is provided. Supersedes <b>serviceArea</b> .                                           |
| <b>audience</b>                        | <b>Audience</b>                                                             | An intended audience, i.e. a group for whom something was created. Supersedes <b>serviceAudience</b> .                                     |
| <b>availableChannel</b>                | <b>ServiceChannel</b>                                                       | A means of accessing the service (e.g. a phone bank, a web site, a location, etc.).                                                        |
| <b>award</b>                           | <b>Text</b>                                                                 | An award won by or for this item. Supersedes <b>awards</b> .                                                                               |
| <b>brand</b>                           | <b>Brand</b> or <b>Organization</b>                                         | The brand(s) associated with a product or service, or the brand(s) maintained by an organization or business person.                       |

| Property                | Expected Type                                                                                       | Description                                                                                                                                                                                                                                                                                                                 |
|-------------------------|-----------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>broker</b>           | <b>Organization</b> or <b>Person</b>                                                                | An entity that arranges for an exchange between a buyer and a seller. In most cases a broker never acquires or releases ownership of a product or service involved in an exchange. If it is not clear whether an entity is a broker, seller, or buyer, the latter two terms are preferred. Supersedes <b>bookingAgent</b> . |
| <b>category</b>         | <b>CategoryCode</b> or <b>PhysicalActivityCategory</b> or <b>Text</b> or <b>Thing</b> or <b>URL</b> | A category for the item. Greater signs or slashes can be used to informally indicate a category hierarchy.                                                                                                                                                                                                                  |
| <b>hasCertification</b> | <b>Certification</b>                                                                                | Certification information about a product, organization, service, place, or person.                                                                                                                                                                                                                                         |
| <b>hasOfferCatalog</b>  | <b>OfferCatalog</b>                                                                                 | Indicates an OfferCatalog listing for this Organization, Person, or Service.                                                                                                                                                                                                                                                |

| <b>offers</b>           | <b>Demand</b> or <b>Offer</b>                | An offer to provide this item—for example, an offer to sell a product, rent the DVD of a movie, perform a service, or give away tickets to an event. Use <b>businessFunction</b> to indicate the kind of transaction offered, i.e. sell, lease, etc. This property can also be used to describe a <b>Demand</b> . While this property is listed as expected on a number of common types, it can be used in others. In that case, using a second type, such as Product or a subtype of Product, can clarify the nature of the offer.<br>Inverse property: <b>itemOffered</b> |
| <b>provider</b>         | <b>Organization</b> or <b>Person</b>         | The service provider, service operator, or service performer; the goods producer. Another party (a seller) may offer those services or goods on behalf of the provider. A provider may also serve as the seller. Supersedes <b>carrier</b> .                                                                                                                                                                                                                                                                                                                                |
| <b>providerMobility</b> | <b>Text</b>                                  | Indicates the mobility of a provided service (e.g. 'static', 'dynamic').                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>review</b>           | <b>Review</b>                                | A review of the item. | <b>termsOfService</b>                | Text or URL              | Human-readable terms of service documentation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Properties from <b>PaymentMethod</b> |                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>paymentMethodType</b>             | PaymentMethodType        | The type of a payment method.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Properties from <b>Thing</b>         |                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>additionalType</b>                | Text or URL              | An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org <a href="#">style guide</a> . |
| <b>alternateName</b>                 | Text                     | An alias for the item.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>description</b>                   | Text or TextObject       | A description of the item.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>disambiguatingDescription</b>     | Text                     | A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.                                                                                                                                                                                                                                                                                                                               |
| <b>identifier</b>                    | PropertyValue or Text or | The identifier property represents any kind of identifier for any kind of <b>Thing</b> , such as ISBNs, GTIN codes, UUIDs etc.                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Property                | Expected Type         | Description                                                                                                                                                                       |
|-------------------------|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         | URL                   | Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See <b>background notes</b> for more details.           |
| <b>image</b>            | ImageObject or URL    | An image of the item. This can be a <b>URL</b> or a fully described <b>ImageObject</b> .                                                                                          |
| <b>mainEntityOfPage</b> | CreativeWork or URL   | Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See <b>background notes</b> for details.<br>Inverse property: <b>mainEntity</b> |
| <b>name</b>             | Text                  | The name of the item.                                                                                                                                                             |
| <b>potentialAction</b>  | Action                | Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.                                                                |
| <b>sameAs</b>           | URL                   | URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.                     |
| <b>subjectOf</b>        | CreativeWork or Event | A CreativeWork or Event about this Thing.<br>Inverse property: <b>about</b>                                                                                                       |
| <b>url</b>              | URL                   | URL of the item.                                                                                                                                                                  |

Instances of **CreditCard** may appear as a value for the following properties

| Property                  | On Types                          | Description                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>hasTierRequirement</b> | <a href="#">MemberProgramTier</a> | A requirement for a user to join a membership tier, for example: a CreditCard if the tier requires sign up for a credit card, A UnitPriceSpecification if the user is required to pay a (periodic) fee, or a MonetaryAmount if the user needs to spend a minimum amount to join the tier. If a tier is free to join then this property does not need to be specified. |

### Financial Industry Business Ontology project

This element is based on the work of the Financial Industry Business Ontology project (see <http://www.fibo.org/schema> for details), in support of the W3C Financial Industry Business Ontology Community Group (<http://www.fibo.org/community>). Many class and property definitions are inspired by or based on <http://www.fibo.org>.

### GoodRelations Vocabulary Classes

This class is derived from the GoodRelations Vocabulary for E-Commerce, created by Martin Hepp. GoodRelations is a data model for sharing e-commerce data on the Web that can be expressed in a variety of syntaxes, including RDFa and HTML5 Microdata. More information about GoodRelations can be found at <http://purl.org/goodrelations/>.
