

DayOfWeek

A Schema.org Enumeration Type

Thing › **Intangible** › **Enumeration** › **DayOfWeek**

[\[more...\]](#)

The day of the week, e.g. used to specify to which day the opening hours of an `OpeningHoursSpecification` refer.

Originally, URLs from `GoodRelations` were used (for `Monday`, `Tuesday`, `Wednesday`, `Thursday`, `Friday`, `Saturday`, `Sunday` plus a special entry for `PublicHolidays`); these have now been integrated directly into schema.org.

Instances of `DayOfWeek` may appear as a value for the following properties

Property	On Types	Description
byDay	Schedule	Defines the day(s) of the week on which a recurring Event takes place. May be specified using either <code>DayOfWeek</code> , or alternatively Text conforming to iCal's syntax for byDay recurrence rules.
dayOfWeek	EducationalOccupationalProgram or OpeningHoursSpecification	The day of the week for which these opening hours are valid.

Enumeration members

- Friday
- Monday
- PublicHolidays
- Saturday
- Sunday
- Thursday
- Tuesday
- Wednesday

GoodRelations Vocabulary Classes

This class is derived from the GoodRelations Vocabulary for E-Commerce, created by Martin Hepp. GoodRelations is a data model for sharing e-commerce data on the Web that can be expressed in a variety of syntaxes, including RDFa and HTML5 Microdata. More information about GoodRelations can be found at <http://purl.org/goodrelations/>.
