

EnergyConsumptionDetails

A Schema.org Type

This term is in the "new" area - implementation feedback and adoption from applications and websites can help improve our definitions.

Thing > **Intangible** > **EnergyConsumptionDetails**

[\[more...\]](#)

EnergyConsumptionDetails represents information related to the energy efficiency of a product that consumes energy. The information that can be provided is based on international regulations such as for example [EU directive 2017/1369](#) for energy labeling and the [Energy labeling rule](#) under the Energy Policy and Conservation Act (EPCA) in the US.

Property	Expected Type	Description
Properties from EnergyConsumptionDetails		
energyEfficiencyScaleMax	EUEnergyEfficiencyEnumeration	Specifies the most energy efficient class on the regulated EU energy consumption scale for the product category a product belongs to. For example, energy consumption for televisions placed on the market after January 1, 2020 is scaled from D to A+++.
energyEfficiencyScaleMin	EUEnergyEfficiencyEnumeration	Specifies the least energy efficient class on the regulated EU energy consumption scale for the product category a product

Property	Expected Type	Description
		belongs to. For example, energy consumption for televisions placed on the market after January 1, 2020 is scaled from D to A+++.
hasEnergyEfficiencyCategory	EnergyEfficiencyEnumeration	Defines the energy efficiency Category (which could be either a rating out of range of values or a yes/no certification) for a product according to an international energy efficiency standard.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.

Property	Expected Type	Description
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **EnergyConsumptionDetails** may appear as a value for the following properties

Property	On Types	Description
hasEnergyConsumptionDetails	Product	Defines the energy efficiency Category (also known as "class" or "rating") for a product according to an international energy efficiency standard.
