

FloorPlan

A Schema.org Type

This term is in the "new" area - implementation feedback and adoption from applications and websites can help improve our definitions.

Thing > **Intangible** > **FloorPlan**

[more...]

A FloorPlan is an explicit representation of a collection of similar accommodations, allowing the provision of common information (room counts, sizes, layout diagrams) and offers for rental or sale. In typical use, some **ApartmentComplex** has an **accommodationFloorPlan** which is a **FloorPlan**. A FloorPlan is always in the context of a particular place, either a larger **ApartmentComplex** or a single **Apartment**. The visual/spatial aspects of a floor plan (i.e. room layout, [see wikipedia](#)) can be indicated using **image**.

Property	Expected Type	Description
Properties from FloorPlan		
amenityFeature	LocationFeatureSpecification	An amenity feature (e.g. a characteristic or service) of the Accommodation. This generic property does not make a statement about whether the feature is included in an offer for the main accommodation or available at extra costs.

Property	Expected Type	Description
floorSize	QuantitativeValue	The size of the accommodation, e.g. in square meter or squarefoot. Typical unit code(s): MTK for square meter, FTK for square foot, or YDK for square yard.
isPlanForApartment	Accommodation	Indicates some accommodation that this floor plan describes.
layoutImage	ImageObject or URL	A schematic image showing the floorplan layout.
numberOfAccommodationUnits	QuantitativeValue	Indicates the total (available plus unavailable) number of accommodation units in an ApartmentComplex , or the number of accommodation units for a specific FloorPlan (within its specific ApartmentComplex). See also numberOfAvailableAccommodationUnits .
numberOfAvailableAccommodationUnits	QuantitativeValue	Indicates the number of available accommodation units in an ApartmentComplex , or the number of accommodation units for a specific FloorPlan (within its specific ApartmentComplex). See also numberOfAccommodationUnits .
numberOfBathroomsTotal	Integer	The total integer number of bathrooms in some Accommodation , following real estate conventions as documented in RESO : "The simple sum of the number of bathrooms. For example for a property with two Full Bathrooms and one Half Bathroom, the Bathrooms Total Integer will be 3.". See also numberOfRooms .

Property	Expected Type	Description
numberOfBedrooms	Number or QuantitativeValue	The total integer number of bedrooms in a some Accommodation , ApartmentComplex or FloorPlan .
numberOfFullBathrooms	Number	Number of full bathrooms - The total number of full and $\frac{3}{4}$ bathrooms in an Accommodation . This corresponds to the BathroomsFull field in RESO.
numberOfPartialBathrooms	Number	Number of partial bathrooms - The total number of half and $\frac{1}{4}$ bathrooms in an Accommodation . This corresponds to the BathroomsPartial field in RESO.
numberOfRooms	Number or QuantitativeValue	The number of rooms (excluding bathrooms and closets) of the accommodation or lodging business. Typical unit code(s): ROM for room or C62 for no unit. The type of room can be put in the unitText property of the QuantitativeValue.
petsAllowed	Boolean or Text	Indicates whether pets are allowed to enter the accommodation or lodging business. More detailed information can be put in a text value.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of

Property	Expected Type	Description
		rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide.
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .

Property	Expected Type	Description
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **FloorPlan** may appear as a value for the following properties

Property	On Types	Description
accommodationFloorPlan	Accommodation or Residence	A floorplan of some Accommodation .
