

GenderType

A Schema.org Enumeration Type

Thing › **Intangible** › **Enumeration** › **GenderType**

[\[more...\]](#)

An enumeration of genders.

Instances of **GenderType** may appear as a value for the following properties

Property	On Types	Description
gender	Person or SportsTeam	Gender of something, typically a Person , but possibly also fictional characters, animals, etc. While https://schema.org/Male and https://schema.org/Female may be used, text strings are also acceptable for people who do not identify as a binary gender. The gender property can also be used in an extended sense to cover e.g. the gender of sports teams. As with the gender of individuals, we do not try to enumerate all possibilities. A mixed-gender SportsTeam can be indicated with a text value of "Mixed".
suggestedGender	PeopleAudience or SizeSpecification	The suggested gender of the intended person or audience, for example "male", "female", or "unisex".

Enumeration members

- Female
- Male
