

GovernmentPermit

A Schema.org Type

Thing › **Intangible** › **Permit** › **GovernmentPermit**

[\[more...\]](#)

A permit issued by a government agency.

Property	Expected Type	Description
Properties from Permit		
issuedBy	Organization	The organization issuing the item, for example a Permit , Ticket , or Certification .
issuedThrough	Service	The service through which the permit was granted.
permitAudience	Audience	The target audience for this permit.
validFor	Duration	The duration of validity of a permit or similar thing.
validFrom	Date or DateTime	The date when the item becomes valid.

Property	Expected Type	Description
validIn	AdministrativeArea	The geographic area where the item is valid. Applies for example to a Permit , a Certification , or an EducationalOccupationalCredential .
validUntil	Date	The date when the item is no longer valid.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.

Property	Expected Type	Description
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.
