

# GovernmentService

A Schema.org Type

**Thing** › **Intangible** › **Service** › **GovernmentService**

[\[more...\]](#)

A service provided by a government organization, e.g. food stamps, veterans benefits, etc.

| Property                                 | Expected Type                            | Description                                                                                                                                                                                              |
|------------------------------------------|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Properties from <b>GovernmentService</b> |                                          |                                                                                                                                                                                                          |
| <b>jurisdiction</b>                      | <b>AdministrativeArea</b> or <b>Text</b> | Indicates a legal jurisdiction, e.g. of some legislation, or where some government service is based.                                                                                                     |
| <b>serviceOperator</b>                   | <b>Organization</b>                      | The operating organization, if different from the provider. This enables the representation of services that are provided by an organization, but operated by another organization like a subcontractor. |
| Properties from <b>Service</b>           |                                          |                                                                                                                                                                                                          |
| <b>aggregateRating</b>                   | <b>AggregateRating</b>                   | The overall rating, based on a collection of reviews or ratings, of the item.                                                                                                                            |

| Property                | Expected Type                                                                                                      | Description                                                                                                                                                                                                                                                                                                                 |
|-------------------------|--------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>areaServed</b>       | <b>AdministrativeArea</b> or<br><b>GeoShape</b> or<br><b>Place</b> or<br><b>Text</b>                               | The geographic area where a service or offered item is provided.<br>Supersedes <b>serviceArea</b> .                                                                                                                                                                                                                         |
| <b>audience</b>         | <b>Audience</b>                                                                                                    | An intended audience, i.e. a group for whom something was created.<br>Supersedes <b>serviceAudience</b> .                                                                                                                                                                                                                   |
| <b>availableChannel</b> | <b>ServiceChannel</b>                                                                                              | A means of accessing the service (e.g. a phone bank, a web site, a location, etc.).                                                                                                                                                                                                                                         |
| <b>award</b>            | <b>Text</b>                                                                                                        | An award won by or for this item. Supersedes <b>awards</b> .                                                                                                                                                                                                                                                                |
| <b>brand</b>            | <b>Brand</b> or<br><b>Organization</b>                                                                             | The brand(s) associated with a product or service, or the brand(s) maintained by an organization or business person.                                                                                                                                                                                                        |
| <b>broker</b>           | <b>Organization</b> or<br><b>Person</b>                                                                            | An entity that arranges for an exchange between a buyer and a seller. In most cases a broker never acquires or releases ownership of a product or service involved in an exchange. If it is not clear whether an entity is a broker, seller, or buyer, the latter two terms are preferred. Supersedes <b>bookingAgent</b> . |
| <b>category</b>         | <b>CategoryCode</b> or<br><b>PhysicalActivityCategory</b><br>or<br><b>Text</b> or<br><b>Thing</b> or<br><b>URL</b> | A category for the item. Greater signs or slashes can be used to informally indicate a category hierarchy.                                                                                                                                                                                                                  |

| Property                | Expected Type                    | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-------------------------|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>hasCertification</b> | <b>Certification</b>             | Certification information about a product, organization, service, place, or person.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>hasOfferCatalog</b>  | <b>OfferCatalog</b>              | Indicates an OfferCatalog listing for this Organization, Person, or Service.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>hoursAvailable</b>   | <b>OpeningHoursSpecification</b> | The hours during which this service or contact is available.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>isRelatedTo</b>      | <b>Product</b> or <b>Service</b> | A pointer to another, somehow related product (or multiple products).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>isSimilarTo</b>      | <b>Product</b> or <b>Service</b> | A pointer to another, functionally similar product (or multiple products).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>logo</b>             | <b>ImageObject</b> or <b>URL</b> | An associated logo.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>offers</b>           | <b>Demand</b> or <b>Offer</b>    | <p>An offer to provide this item—for example, an offer to sell a product, rent the DVD of a movie, perform a service, or give away tickets to an event. Use <b>businessFunction</b> to indicate the kind of transaction offered, i.e. sell, lease, etc. This property can also be used to describe a <b>Demand</b>. While this property is listed as expected on a number of common types, it can be used in others. In that case, using a second type, such as Product or a subtype of Product, can clarify the nature of the offer.</p> <p>Inverse property: <b>itemOffered</b></p> |

| Property                     | Expected Type                                | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>provider</b>              | <b>Organization</b> or <b>Person</b>         | The service provider, service operator, or service performer; the goods producer. Another party (a seller) may offer those services or goods on behalf of the provider. A provider may also serve as the seller. Supersedes <b>carrier</b> .                                                                                                                                                                                                                                                                                                                                   |
| <b>providerMobility</b>      | <b>Text</b>                                  | Indicates the mobility of a provided service (e.g. 'static', 'dynamic').                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>review</b>                | <b>Review</b>                                | A review of the item. Supersedes <b>reviews</b> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>serviceOutput</b>         | <b>Thing</b>                                 | The tangible thing generated by the service, e.g. a passport, permit, etc. Supersedes <b>produces</b> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>serviceType</b>           | <b>GovernmentBenefitsType</b> or <b>Text</b> | The type of service being offered, e.g. veterans' benefits, emergency relief, etc.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>slogan</b>                | <b>Text</b>                                  | A slogan or motto associated with the item.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>termsOfService</b>        | <b>Text</b> or <b>URL</b>                    | Human-readable terms of service documentation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Properties from <b>Thing</b> |                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>additionalType</b>        | <b>Text</b> or <b>URL</b>                    | An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of <code>rdf:type</code> in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org <b>style guide</b> . |

| Property                         | Expected Type                      | Description                                                                                                                                                                                                                                                                                            |
|----------------------------------|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>alternateName</b>             | Text                               | An alias for the item.                                                                                                                                                                                                                                                                                 |
| <b>description</b>               | Text or<br>TextObject              | A description of the item.                                                                                                                                                                                                                                                                             |
| <b>disambiguatingDescription</b> | Text                               | A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.                                                           |
| <b>identifier</b>                | PropertyValue or<br>Text or<br>URL | The identifier property represents any kind of identifier for any kind of <b>Thing</b> , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See <b>background notes</b> for more details. |
| <b>image</b>                     | ImageObject or<br>URL              | An image of the item. This can be a <b>URL</b> or a fully described <b>ImageObject</b> .                                                                                                                                                                                                               |
| <b>mainEntityOfPage</b>          | CreativeWork or<br>URL             | Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See <b>background notes</b> for details.<br>Inverse property: <b>mainEntity</b>                                                                                                                      |
| <b>name</b>                      | Text                               | The name of the item.                                                                                                                                                                                                                                                                                  |
| <b>potentialAction</b>           | Action                             | Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.                                                                                                                                                                                     |

| Property         | Expected Type         | Description                                                                                                                                                   |
|------------------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>sameAs</b>    | URL                   | URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website. |
| <b>subjectOf</b> | CreativeWork or Event | A CreativeWork or Event about this Thing.<br>Inverse property: <b>about</b>                                                                                   |
| <b>url</b>       | URL                   | URL of the item.                                                                                                                                              |

Instances of **GovernmentService** may appear as a value for the following properties

| Property                      | On Types            | Description                                                                                                  |
