

Grant

A Schema.org Type

This term is in the "new" area - implementation feedback and adoption from applications and websites can help improve our definitions.

Thing › **Intangible** › **Grant**

[more...]

A grant, typically financial or otherwise quantifiable, of resources. Typically a **funder** sponsors some **MonetaryAmount** to an **Organization** or **Person**, sometimes not necessarily via a dedicated or long-lived **Project**, resulting in one or more outputs, or **fundedItems**. For financial sponsorship, indicate the **funder** of a **MonetaryGrant**. For non-financial support, indicate **sponsor** of **Grants** of resources (e.g. office space).

Grants support activities directed towards some agreed collective goals, often but not always organized as **Projects**. Long-lived projects are sometimes sponsored by a variety of grants over time, but it is also common for a project to be associated with a single grant.

The amount of a **Grant** is represented using **amount** as a **MonetaryAmount**.

Property	Expected Type	Description
Properties from Grant		

Property	Expected Type	Description
fundedItem	BioChemEntity or CreativeWork or Event or MedicalEntity or Organization or Person or Product	Indicates something directly or indirectly funded or sponsored through a Grant . See also ownershipFundingInfo . Inverse property: funding
funder	Organization or Person	A person or organization that supports (sponsors) something through some kind of financial contribution.
sponsor	Organization or Person	A person or organization that supports a thing through a pledge, promise, or financial contribution. E.g. a sponsor of a Medical Study or a corporate sponsor of an event.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of <code>rdf:type</code> in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .

Property	Expected Type	Description
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.

Property	Expected Type	Description
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **Grant** may appear as a value for the following properties

Property	On Types	Description
funding	BioChemEntity or CreativeWork or Event or MedicalEntity or Organization or Person or Product	A Grant that directly or indirectly provide funding or sponsorship for this item. See also ownershipFundingInfo .

More specific Types

- **MonetaryGrant**
