

Invoice

A Schema.org Type

Thing › **Intangible** › **Invoice**

[\[more...\]](#)

A statement of the money due for goods or services; a bill.

Property	Expected Type	Description
Properties from Invoice		
accountId	Text	The identifier for the account the payment will be applied to.
billingPeriod	Duration	The time interval used to compute the invoice.
broker	Organization or Person	An entity that arranges for an exchange between a buyer and a seller. In most cases a broker never acquires or releases ownership of a product or service involved in an exchange. If it is not clear whether an entity is a broker, seller, or buyer, the latter two terms are preferred. Supersedes bookingAgent .
category	CategoryCode or PhysicalActivityCategory or	A category for the item. Greater signs or slashes can be used to informally indicate a category hierarchy.

Property	Expected Type	Description
	Text or Thing or URL	
confirmationNumber	Text	A number that confirms the given order or payment has been received.
customer	Organization or Person	Party placing the order or paying the invoice.
minimumPaymentDue	MonetaryAmount or PriceSpecification	The minimum payment required at this time.
paymentDueDate	Date or DateTime	The date that payment is due. Supersedes paymentDue .
paymentMethod	PaymentMethod or Text	The name of the credit card or other method of payment for the order.
paymentMethodId	Text	An identifier for the method of payment used (e.g. the last 4 digits of the credit card).
paymentStatus	PaymentStatusType or Text	The status of payment; whether the invoice has been paid or not.
provider	Organization or Person	The service provider, service operator, or service performer; the goods producer. Another party (a seller) may offer those services or goods on behalf of the provider. A provider may also serve as the seller. Supersedes carrier .
referencesOrder	Order	The Order(s) related to this Invoice. One or more Orders may be combined into a single Invoice.

Property	Expected Type	Description
scheduledPaymentDate	Date	The date the invoice is scheduled to be paid.
totalPaymentDue	MonetaryAmount or PriceSpecification	The total amount due.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.

Property	Expected Type	Description
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **Invoice** may appear as a value for the following properties

Property	On Types	Description
partOfInvoice	Order	The order is being paid as part of the referenced Invoice.

Examples
