

# LegalValueLevel

A Schema.org Enumeration Type

*This term is in the "new" area - implementation feedback and adoption from applications and websites can help improve our definitions.*

**Thing** › **Intangible** › **Enumeration** › **LegalValueLevel**

[\[more...\]](#)

A list of possible levels for the legal validity of a legislation.

Instances of **LegalValueLevel** may appear as a value for the following properties

| Property                     | On Types                          | Description                                                                                                                                                                                                                     |
|------------------------------|-----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>legislationLegalValue</b> | <a href="#">LegislationObject</a> | The legal value of this legislation file. The same legislation can be written in multiple files with different legal values. Typically a digitally signed PDF have a "stronger" legal value than the HTML file of the same act. |
