

MediaManipulationRatingEnumeration

A Schema.org Enumeration Type

This term is in the "new" area - implementation feedback and adoption from applications and websites can help improve our definitions.

Thing > **Intangible** > **Enumeration** > **MediaManipulationRatingEnumeration**

[\[more...\]](#)

Codes for use with the **mediaAuthenticityCategory** property, indicating the authenticity of a media object (in the context of how it was published or shared). In general these codes are not mutually exclusive, although some combinations (such as 'original' versus 'transformed', 'edited' and 'staged') would be contradictory if applied in the same **MediaReview**. Note that the application of these codes is with regard to a piece of media shared or published in a particular context.

Instances of **MediaManipulationRatingEnumeration** may appear as a value for the following properties

Property	On Types	Description
mediaAuthenticityCategory	MediaReview	Indicates a MediaManipulationRatingEnumeration classification of a media object (in the context of how it was published or shared).

Enumeration members

- DecontextualizedContent
- EditedOrCroppedContent
- OriginalMediaContent
- SatireOrParodyContent
- StagedContent
- TransformedContent
