

MedicalCondition

A Schema.org Type

Thing > **MedicalEntity** > **MedicalCondition**

[\[more...\]](#)

Any condition of the human body that affects the normal functioning of a person, whether physically or mentally. Includes diseases, injuries, disabilities, disorders, syndromes, etc.

Property	Expected Type	Description
Properties from MedicalCondition		
associatedAnatomy	AnatomicalStructure or AnatomicalSystem or SuperficialAnatomy	The anatomy of the underlying organ system or structures associated with this entity.
differentialDiagnosis	DDxElement	One of a set of differential diagnoses for the condition. Specifically, a closely-related or competing diagnosis typically considered later in the cognitive process whereby this medical condition is distinguished from others most likely responsible for a similar collection of signs and symptoms to reach the most parsimonious diagnosis or diagnoses in a patient.

Property	Expected Type	Description
drug	Drug	Specifying a drug or medicine used in a medication procedure.
epidemiology	Text	The characteristics of associated patients, such as age, gender, race etc.
expectedPrognosis	Text	The likely outcome in either the short term or long term of the medical condition.
naturalProgression	Text	The expected progression of the condition if it is not treated and allowed to progress naturally.
pathophysiology	Text	Changes in the normal mechanical, physical, and biochemical functions that are associated with this activity or condition.
possibleComplication	Text	A possible unexpected and unfavorable evolution of a medical condition. Complications may include worsening of the signs or symptoms of the disease, extension of the condition to other organ systems, etc.
possibleTreatment	MedicalTherapy	A possible treatment to address this condition, sign or symptom.
primaryPrevention	MedicalTherapy	A preventative therapy used to prevent an initial occurrence of the medical condition, such as vaccination.
riskFactor	MedicalRiskFactor	A modifiable or non-modifiable factor that increases the risk of a patient contracting this condition, e.g. age, coexisting condition.
secondaryPrevention	MedicalTherapy	A preventative therapy used to prevent reoccurrence of the medical condition after an initial episode of the condition.
signOrSymptom	MedicalSignOrSymptom	A sign or symptom of this condition. Signs are objective or physically observable manifestations of the medical condition while symptoms are the subjective experience of the medical condition.

Property	Expected Type	Description
stage	MedicalConditionStage	The stage of the condition, if applicable.
status	EventStatusType or MedicalStudyStatus or Text	The status of the study (enumerated).
typicalTest	MedicalTest	A medical test typically performed given this condition.
Properties from MedicalEntity		
code	MedicalCode	A medical code for the entity, taken from a controlled vocabulary or ontology such as ICD-9, DiseasesDB, MeSH, SNOMED-CT, RxNorm, etc.
funding	Grant	A Grant that directly or indirectly provide funding or sponsorship for this item. See also ownershipFundingInfo . Inverse property: fundedItem
guideline	MedicalGuideline	A medical guideline related to this entity.
legalStatus	DrugLegalStatus or MedicalEnumeration or Text	The drug or supplement's legal status, including any controlled substance schedules that apply.
medicineSystem	MedicineSystem	The system of medicine that includes this MedicalEntity, for example 'evidence-based', 'homeopathic', 'chiropractic', etc.
recognizingAuthority	Organization	If applicable, the organization that officially recognizes this entity as part of its endorsed system of medicine.
relevantSpecialty	MedicalSpecialty	If applicable, a medical specialty in which this entity is relevant.

Property	Expected Type	Description
study	MedicalStudy	A medical study or trial related to this entity.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of <code>rdf:type</code> in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .

Property	Expected Type	Description
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **MedicalCondition** may appear as a value for the following properties

Property	On Types	Description
associatedDisease	BioChemEntity	Disease associated to this BioChemEntity. Such disease can be a MedicalCondition or a URL. If you want to add an evidence supporting the association, please use PropertyValue.
diagnosis	DDxElement or Patient	One or more alternative conditions considered in the differential diagnosis process as output of a diagnosis process.

Property	On Types	Description
healthCondition	MedicalStudy or Patient or PeopleAudience	Specifying the health condition(s) of a patient, medical study, or other target audience.
relatedCondition	AnatomicalStructure or AnatomicalSystem or SuperficialAnatomy	A medical condition associated with this anatomy.
usedToDiagnose	MedicalTest	A condition the test is used to diagnose.

More specific Types
