

# MedicalStudy

A Schema.org Type

**Thing** > **MedicalEntity** > **MedicalStudy**

[\[more...\]](#)

A medical study is an umbrella type covering all kinds of research studies relating to human medicine or health, including observational studies and interventional trials and registries, randomized, controlled or not. When the specific type of study is known, use one of the extensions of this type, such as `MedicalTrial` or `MedicalObservationalStudy`. Also, note that this type should be used to mark up data that describes the study itself; to tag an article that publishes the results of a study, use `MedicalScholarlyArticle`. Note: use the `code` property of `MedicalEntity` to store study IDs, e.g. `clinicaltrials.gov` ID.

| Property                            | Expected Type                                       | Description                                                                                                                                                                |
|-------------------------------------|-----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Properties from <b>MedicalStudy</b> |                                                     |                                                                                                                                                                            |
| <b>healthCondition</b>              | <b>MedicalCondition</b>                             | Specifying the health condition(s) of a patient, medical study, or other target audience.                                                                                  |
| <b>sponsor</b>                      | <b>Organization</b> or <b>Person</b>                | A person or organization that supports a thing through a pledge, promise, or financial contribution. E.g. a sponsor of a Medical Study or a corporate sponsor of an event. |
| <b>status</b>                       | <b>EventStatusType</b> or <b>MedicalStudyStatus</b> | The status of the study (enumerated).                                                                                                                                      |

| Property                             | Expected Type                                                               | Description                                                                                                                                                            |
|--------------------------------------|-----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                      | or<br><b>Text</b>                                                           |                                                                                                                                                                        |
| <b>studyLocation</b>                 | <b>AdministrativeArea</b>                                                   | The location in which the study is taking/took place.                                                                                                                  |
| <b>studySubject</b>                  | <b>MedicalEntity</b>                                                        | A subject of the study, i.e. one of the medical conditions, therapies, devices, drugs, etc. investigated by the study.                                                 |
| Properties from <b>MedicalEntity</b> |                                                                             |                                                                                                                                                                        |
| <b>code</b>                          | <b>MedicalCode</b>                                                          | A medical code for the entity, taken from a controlled vocabulary or ontology such as ICD-9, DiseasesDB, MeSH, SNOMED-CT, RxNorm, etc.                                 |
| <b>funding</b>                       | <b>Grant</b>                                                                | A <b>Grant</b> that directly or indirectly provide funding or sponsorship for this item. See also <b>ownershipFundingInfo</b> .<br>Inverse property: <b>fundedItem</b> |
| <b>guideline</b>                     | <b>MedicalGuideline</b>                                                     | A medical guideline related to this entity.                                                                                                                            |
| <b>legalStatus</b>                   | <b>DrugLegalStatus</b> or<br><b>MedicalEnumeration</b><br>or<br><b>Text</b> | The drug or supplement's legal status, including any controlled substance schedules that apply.                                                                        |
| <b>medicineSystem</b>                | <b>MedicineSystem</b>                                                       | The system of medicine that includes this MedicalEntity, for example 'evidence-based', 'homeopathic', 'chiropractic', etc.                                             |
| <b>recognizingAuthority</b>          | <b>Organization</b>                                                         | If applicable, the organization that officially recognizes this entity as part of its endorsed system of medicine.                                                     |
| <b>relevantSpecialty</b>             | <b>MedicalSpecialty</b>                                                     | If applicable, a medical specialty in which this entity is relevant.                                                                                                   |

| Property                         | Expected Type                                     | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|----------------------------------|---------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>study</b>                     | <b>MedicalStudy</b>                               | A medical study or trial related to this entity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Properties from <b>Thing</b>     |                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>additionalType</b>            | <b>Text</b> or <b>URL</b>                         | An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of <code>rdf:type</code> in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org <b>style guide</b> . |
| <b>alternateName</b>             | <b>Text</b>                                       | An alias for the item.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>description</b>               | <b>Text</b> or <b>TextObject</b>                  | A description of the item.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>disambiguatingDescription</b> | <b>Text</b>                                       | A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.                                                                                                                                                                                                                                                                                                                                   |
| <b>identifier</b>                | <b>PropertyValue</b> or <b>Text</b> or <b>URL</b> | The identifier property represents any kind of identifier for any kind of <b>Thing</b> , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See <b>background notes</b> for more details.                                                                                                                                                                                                                                                                         |
| <b>image</b>                     | <b>ImageObject</b> or <b>URL</b>                  | An image of the item. This can be a <b>URL</b> or a fully described <b>ImageObject</b> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Property                | Expected Type                       | Description                                                                                                                                                                       |
|-------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>mainEntityOfPage</b> | <b>CreativeWork</b> or <b>URL</b>   | Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See <b>background notes</b> for details.<br>Inverse property: <b>mainEntity</b> |
| <b>name</b>             | <b>Text</b>                         | The name of the item.                                                                                                                                                             |
| <b>potentialAction</b>  | <b>Action</b>                       | Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.                                                                |
| <b>sameAs</b>           | <b>URL</b>                          | URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.                     |
| <b>subjectOf</b>        | <b>CreativeWork</b> or <b>Event</b> | A CreativeWork or Event about this Thing.<br>Inverse property: <b>about</b>                                                                                                       |
| <b>url</b>              | <b>URL</b>                          | URL of the item.                                                                                                                                                                  |

Instances of **MedicalStudy** may appear as a value for the following properties
