

MenuItem

A Schema.org Type

Thing > **Intangible** > **MenuItem**

[\[more...\]](#)

A food or drink item listed in a menu or menu section.

Property	Expected Type	Description
Properties from MenuItem		
menuAddOn	MenuItem or MenuSection	Additional menu item(s) such as a side dish of salad or side order of fries that can be added to this menu item. Additionally it can be a menu section containing allowed add-on menu items for this menu item.
nutrition	NutritionInformation	Nutrition information about the recipe or menu item.
offers	Demand or Offer	An offer to provide this item—for example, an offer to sell a product, rent the DVD of a movie, perform a service, or give away tickets to an event. Use businessFunction to indicate the kind of transaction offered, i.e. sell, lease, etc. This property can also be used to describe a Demand . While this property is listed as expected on a number of common types, it can be used in others. In that case, using a second type, such as Product or a subtype of

Property	Expected Type	Description
		Product, can clarify the nature of the offer. Inverse property: itemOffered
suitableForDiet	RestrictedDiet	Indicates a dietary restriction or guideline for which this recipe or menu item is suitable, e.g. diabetic, halal etc.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.

Property	Expected Type	Description
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **MenuItem** may appear as a value for the following properties

Property	On Types	Description
hasMenuItem	Menu or MenuSection	A food or drink item contained in a menu or menu section.
itemOffered	Demand or Offer	An item being offered (or demanded). The transactional nature of the offer or demand is documented using businessFunction , e.g. sell, lease etc. While several common expected types are listed explicitly

Property	On Types	Description
		in this definition, others can be used. Using a second type, such as Product or a subtype of Product, can clarify the nature of the offer.
menuAddOn	MenuItem	Additional menu item(s) such as a side dish of salad or side order of fries that can be added to this menu item. Additionally it can be a menu section containing allowed add-on menu items for this menu item.
