

MerchantReturnPolicy

A Schema.org Type

This term is in the "new" area - implementation feedback and adoption from applications and websites can help improve our definitions.

Thing > **Intangible** > **MerchantReturnPolicy**

[\[more...\]](#)

A MerchantReturnPolicy provides information about product return policies associated with an **Organization**, **Product**, or **Offer**.

Property	Expected Type	Description
Properties from MerchantReturnPolicy		
additionalProperty	PropertyValue	A property-value pair representing an additional characteristic of the entity, e.g. a product feature or another characteristic for which there is no matching property in schema.org. Note: Publishers should be aware that applications designed to use specific schema.org properties (e.g.

Property	Expected Type	Description
		https://schema.org/width , https://schema.org/color , https://schema.org/gtin13 , ...) will typically expect such data to be provided using those properties, rather than using the generic property/value mechanism
applicableCountry	Country or Text	A country where a particular merchant return policy applies to, for example the two-letter ISO 3166-1 alpha-2 country code.
customerRemorseReturnFees	ReturnFeesEnumeration	The type of return fees if the product is returned due to customer remorse.
customerRemorseReturnLabelSource	ReturnLabelSourceEnumeration	The method (from an enumeration) by which the customer obtains a return shipping label for a product returned due to customer remorse.
customerRemorseReturnShippingFeesAmount	MonetaryAmount	The amount of shipping costs if a product is returned due to customer remorse. Applicable when property customerRemorseReturnFees equals ReturnShippingFees .
inStoreReturnsOffered	Boolean	Are in-store returns offered? (For more advanced return methods use the returnMethod property.)

Property	Expected Type	Description
itemCondition	OfferItemCondition	A predefined value from OfferItemCondition specifying the condition of the product or service, or the products or services included in the offer. Also used for product return policies to specify the condition of products accepted for returns.
itemDefectReturnFees	ReturnFeesEnumeration	The type of return fees for returns of defect products.
itemDefectReturnLabelSource	ReturnLabelSourceEnumeration	The method (from an enumeration) by which the customer obtains a return shipping label for a defect product.
itemDefectReturnShippingFeesAmount	MonetaryAmount	Amount of shipping costs for defect product returns. Applicable when property itemDefectReturnFees equals ReturnShippingFees .
merchantReturnDays	Date or DateTime or Integer	Specifies either a fixed return date or the number of days (from the delivery date) that a product can be returned. Used when the returnPolicyCategory property is specified as MerchantReturnFiniteReturnWindow . Supersedes productReturnDays .
merchantReturnLink	URL	Specifies a Web page or service by URL for product returns. Supersedes

Property	Expected Type	Description
		productReturnLink .
refundType	RefundTypeEnumeration	A refund type, from an enumerated list.
restockingFee	MonetaryAmount or Number	Use MonetaryAmount to specify a fixed restocking fee for product returns, or use Number to specify a percentage of the product price paid by the customer.
returnFees	ReturnFeesEnumeration	The type of return fees for purchased products (for any return reason).
returnLabelSource	ReturnLabelSourceEnumeration	The method (from an enumeration) by which the customer obtains a return shipping label for a product returned for any reason.
returnMethod	ReturnMethodEnumeration	The type of return method offered, specified from an enumeration.
returnPolicyCategory	MerchantReturnEnumeration	Specifies an applicable return policy (from an enumeration).

Property	Expected Type	Description
returnPolicyCountry	Country or Text	The country where the product has to be sent to for returns, for example "Ireland" using the name property of Country . You can also provide the two-letter ISO 3166 alpha-2 country code . Note that this can be different from the country where the product was originally shipped from or sent to.
returnPolicySeasonalOverride	MerchantReturnPolicySeasonalOverride	Seasonal override of a return policy.
returnShippingFeesAmount	MonetaryAmount	Amount of shipping costs for product returns (for any reason). Applicable when property returnFees equals ReturnShippingFees .
validForMemberTier	MemberProgramTier	The membership program tier an Offer (or a PriceSpecification, OfferShippingDetails, or MerchantReturnPolicy under an Offer) is valid for.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is. Typically the value is a URI-identified Resource.

Property	Expected Type	Description
		class, and in this case corresponds to the use of <code>rdf:type</code> in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide.
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing, such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URIs (URI) links. See background notes for more details.

Property	Expected Type	Description
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **MerchantReturnPolicy** may appear as a value for the following properties

Property	On Types	Description
hasMerchantReturnPolicy	Offer or Organization or Product	Specifies a MerchantReturnPolicy that may be applicable.

Supersedes
ProductReturnPolicy
