

NutritionInformation

A Schema.org Type

[Thing](#) > [Intangible](#) > [StructuredValue](#) > **NutritionInformation**

[\[more...\]](#)

Nutritional information about the recipe.

Property	Expected Type	Description
Properties from NutritionInformation		
calories	Energy	The number of calories.
carbohydrateContent	Mass	The number of grams of carbohydrates.
cholesterolContent	Mass	The number of milligrams of cholesterol.
fatContent	Mass	The number of grams of fat.
fiberContent	Mass	The number of grams of fiber.
proteinContent	Mass	The number of grams of protein.
saturatedFatContent	Mass	The number of grams of saturated fat.

Property	Expected Type	Description
servingSize	Text	The serving size, in terms of the number of volume or mass.
sodiumContent	Mass	The number of milligrams of sodium.
sugarContent	Mass	The number of grams of sugar.
transFatContent	Mass	The number of grams of trans fat.
unsaturatedFatContent	Mass	The number of grams of unsaturated fat.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for

Property	Expected Type	Description
	Text or URL	representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **NutritionInformation** may appear as a value for the following properties

Property	On Types	Description
nutrition	MenuItem or Recipe	Nutrition information about the recipe or menu item.
