

OfferShippingDetails

A Schema.org Type

Thing › **Intangible** › **StructuredValue** › **OfferShippingDetails**

[\[more...\]](#)

OfferShippingDetails represents information about shipping destinations.

Multiple of these entities can be used to represent different shipping rates for different destinations:

One entity for Alaska/Hawaii. A different one for continental US. A different one for all France.

Multiple of these entities can be used to represent different shipping costs and delivery times.

Two entities that are identical but differ in rate and time:

E.g. Cheaper and slower: \$5 in 5-7 days or Fast and expensive: \$15 in 1-2 days.

Property	Expected Type	Description
Properties from OfferShippingDetails		
deliveryTime	ShippingDeliveryTime	The total delay between the receipt of the order and the goods reaching the final customer.

Property	Expected Type	Description
depth	Distance or QuantitativeValue	The depth of the item.
doesNotShip	Boolean	Indicates when shipping to a particular shippingDestination is not available.
height	Distance or QuantitativeValue	The height of the item.
shippingDestination	DefinedRegion	indicates (possibly multiple) shipping destinations. These can be defined in several ways, e.g. postalCode ranges.
shippingLabel	Text	Label to match an OfferShippingDetails with a ShippingRateSettings (within the context of a shippingSettingsLink cross-reference).
shippingOrigin	DefinedRegion	Indicates the origin of a shipment, i.e. where it should be coming from.
shippingRate	MonetaryAmount	The shipping rate is the cost of shipping to the specified destination. Typically, the max Value and currency values (of the MonetaryAmount) are most appropriate.
shippingSettingsLink	URL	Link to a page containing ShippingRateSettings and DeliveryTimeSettings details.
transitTimeLabel	Text	Label to match an OfferShippingDetails with a DeliveryTimeSettings (within the context of a shippingSettingsLink cross-reference).

Property	Expected Type	Description
validForMemberTier	MemberProgramTier	The membership program tier an Offer (or a PriceSpecification, OfferShippingDetails, or MerchantReturnPolicy under an Offer) is valid for.
weight	QuantitativeValue	The weight of the product or person.
width	Distance or QuantitativeValue	The width of the item.
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .
alternateName	Text	An alias for the item.
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.

Property	Expected Type	Description
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about
url	URL	URL of the item.

Instances of **OfferShippingDetails** may appear as a value for the following properties

Property	On Types	Description
shippingDetails	Offer	Indicates information about the shipping policies and options associated with an Offer .
