

Order

A Schema.org Type

Thing > **Intangible** > **Order**

[\[more...\]](#)

An order is a confirmation of a transaction (a receipt), which can contain multiple line items, each represented by an Offer that has been accepted by the customer.

Property	Expected Type	Description
Properties from Order		
acceptedOffer	Offer	The offer(s) -- e.g., product, quantity and price combinations -- included in the order.
billingAddress	PostalAddress	The billing address for the order.
broker	Organization or Person	An entity that arranges for an exchange between a buyer and a seller. In most cases a broker never acquires or releases ownership of a product or service involved in an exchange. If it is not clear whether an entity is a broker, seller, or buyer, the latter two terms are preferred. Supersedes bookingAgent .
confirmationNumber	Text	A number that confirms the given order or payment has been received.

Property	Expected Type	Description
customer	Organization or Person	Party placing the order or paying the invoice.
discount	Number or Text	Any discount applied (to an Order).
discountCode	Text	Code used to redeem a discount.
discountCurrency	Text	The currency of the discount.
isGift	Boolean	Use standard formats: ISO 4217 currency format , e.g. "USD"; Ticker symbol for cryptocurrencies, e.g. "BTC"; well known names for Local Exchange Trading Systems (LETS) and other currency types, e.g. "Ithaca HOUR".
orderDate	Date or DateTime	Indicates whether the offer was accepted as a gift for someone other than the buyer.
orderDelivery	ParcelDelivery	Date order was placed.
orderNumber	Text	The delivery of the parcel related to this order or order item.
orderStatus	Text	The identifier of the transaction.
orderedItem	OrderStatus	The current status of the order.
	OrderItem or Product or Service	The item ordered.

Property	Expected Type	Description
partOfInvoice	Invoice	The order is being paid as part of the referenced Invoice.
paymentDueDate	Date or DateTime	The date that payment is due. Supersedes paymentDue .
paymentMethod	PaymentMethod or Text	The name of the credit card or other method of payment for the order.
paymentMethodId	Text	An identifier for the method of payment used (e.g. the last 4 digits of the credit card).
paymentUrl	URL	The URL for sending a payment.
seller	Organization or Person	An entity which offers (sells / leases / lends / loans) the services / goods. A seller may also be a provider. Supersedes merchant , vendor .
Properties from Thing		
additionalType	Text or URL	An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the schema.org style guide .
alternateName	Text	An alias for the item.

Property	Expected Type	Description
description	Text or TextObject	A description of the item.
disambiguatingDescription	Text	A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.
identifier	PropertyValue or Text or URL	The identifier property represents any kind of identifier for any kind of Thing , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See background notes for more details.
image	ImageObject or URL	An image of the item. This can be a URL or a fully described ImageObject .
mainEntityOfPage	CreativeWork or URL	Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See background notes for details. Inverse property: mainEntity
name	Text	The name of the item.
potentialAction	Action	Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.
sameAs	URL	URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.
subjectOf	CreativeWork or Event	A CreativeWork or Event about this Thing. Inverse property: about

Property	Expected Type	Description
url	URL	URL of the item.

Instances of **Order** may appear as a value for the following properties

Property	On Types	Description
partOfOrder	ParcelDelivery	The overall order the items in this delivery were included in.
referencesOrder	Invoice	The Order(s) related to this Invoice. One or more Orders may be combined into a single Invoice.
