

# PublicationEvent

A Schema.org Type

**Thing** › **Event** › **PublicationEvent**

[\[more...\]](#)

A PublicationEvent corresponds indifferently to the event of publication for a CreativeWork of any type, e.g. a broadcast event, an on-demand event, a book/journal publication via a variety of delivery media.

| Property                                | Expected Type                        | Description                                                              |
|-----------------------------------------|--------------------------------------|--------------------------------------------------------------------------|
| Properties from <b>PublicationEvent</b> |                                      |                                                                          |
| <b>publishedBy</b>                      | <b>Organization</b> or <b>Person</b> | An agent associated with the publication event.                          |
| <b>publishedOn</b>                      | <b>BroadcastService</b>              | A broadcast service associated with the publication event.               |
| Properties from <b>Event</b>            |                                      |                                                                          |
| <b>about</b>                            | <b>Thing</b>                         | The subject matter of the content.<br>Inverse property: <b>subjectOf</b> |

| Property               | Expected Type                           | Description                                                                                                                                                                                              |
|------------------------|-----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>actor</b>           | <b>PerformingGroup</b> or <b>Person</b> | An actor (individual or a group), e.g. in TV, radio, movie, video games etc., or in an event. Actors can be associated with individual items or with a series, episode, clip. Supersedes <b>actors</b> . |
| <b>aggregateRating</b> | <b>AggregateRating</b>                  | The overall rating, based on a collection of reviews or ratings, of the item.                                                                                                                            |
| <b>attendee</b>        | <b>Organization</b> or <b>Person</b>    | A person or organization attending the event. Supersedes <b>attendees</b> .                                                                                                                              |
| <b>audience</b>        | <b>Audience</b>                         | An intended audience, i.e. a group for whom something was created. Supersedes <b>serviceAudience</b> .                                                                                                   |
| <b>composer</b>        | <b>Organization</b> or <b>Person</b>    | The person or organization who wrote a composition, or who is the composer of a work performed at some event.                                                                                            |
| <b>contributor</b>     | <b>Organization</b> or <b>Person</b>    | A secondary contributor to the CreativeWork or Event.                                                                                                                                                    |
| <b>director</b>        | <b>Person</b>                           | A director of e.g. TV, radio, movie, video gaming etc. content, or of an event. Directors can be associated with individual items or with a series, episode, clip. Supersedes <b>directors</b> .         |
| <b>doorTime</b>        | <b>DateTime</b> or <b>Time</b>          | The time admission will commence.                                                                                                                                                                        |

| Property                   | Expected Type                         | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|----------------------------|---------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>duration</b>            | <b>Duration</b>                       | The duration of the item (movie, audio recording, event, etc.) in <b>ISO 8601 duration format</b> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>endDate</b>             | <b>Date</b> or <b>DateTime</b>        | The end date and time of the item (in <b>ISO 8601 date format</b> ).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>eventAttendanceMode</b> | <b>EventAttendanceModeEnumeration</b> | The eventAttendanceMode of an event indicates whether it occurs online, offline, or a mix.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>eventSchedule</b>       | <b>Schedule</b>                       | Associates an <b>Event</b> with a <b>Schedule</b> . There are circumstances where it is preferable to share a schedule for a series of repeating events rather than data on the individual events themselves. For example, a website or application might prefer to publish a schedule for a weekly gym class rather than provide data on every event. A schedule could be processed by applications to add forthcoming events to a calendar. An <b>Event</b> that is associated with a <b>Schedule</b> using this property should not have <b>startDate</b> or <b>endDate</b> properties. These are instead defined within the associated <b>Schedule</b> , this avoids any ambiguity for clients using the data. The property might have repeated values to specify different schedules, e.g. for different months or seasons. |
| <b>eventStatus</b>         | <b>EventStatusType</b>                | An eventStatus of an event represents its status; particularly useful when an event is cancelled or rescheduled.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Property                               | Expected Type                                                                 | Description                                                                                                                                                                                                   |
|----------------------------------------|-------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>funder</b>                          | <b>Organization</b> or <b>Person</b>                                          | A person or organization that supports (sponsors) something through some kind of financial contribution.                                                                                                      |
| <b>funding</b>                         | <b>Grant</b>                                                                  | A <b>Grant</b> that directly or indirectly provide funding or sponsorship for this item. See also <b>ownershipFundingInfo</b> .<br>Inverse property: <b>fundedItem</b>                                        |
| <b>inLanguage</b>                      | <b>Language</b> or <b>Text</b>                                                | The language of the content or performance or used in an action. Please use one of the language codes from the <b>IETF BCP 47 standard</b> . See also <b>availableLanguage</b> . Supersedes <b>language</b> . |
| <b>isAccessibleForFree</b>             | <b>Boolean</b>                                                                | A flag to signal that the item, event, or place is accessible for free. Supersedes <b>free</b> .                                                                                                              |
| <b>keywords</b>                        | <b>DefinedTerm</b> or <b>Text</b> or <b>URL</b>                               | Keywords or tags used to describe some item. Multiple textual entries in a keywords list are typically delimited by commas, or by repeating the property.                                                     |
| <b>location</b>                        | <b>Place</b> or <b>PostalAddress</b> or <b>Text</b> or <b>VirtualLocation</b> | The location of, for example, where an event is happening, where an organization is located, or where an action takes place.                                                                                  |
| <b>maximumAttendeeCapacity</b>         | <b>Integer</b>                                                                | The total number of individuals that may attend an event or venue.                                                                                                                                            |
| <b>maximumPhysicalAttendeeCapacity</b> | <b>Integer</b>                                                                | The maximum physical attendee capacity of an <b>Event</b> whose <b>eventAttendanceMode</b> is <b>OfflineEventAttendanceMode</b> (or the offline                                                               |

| Property                              | Expected Type                        | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|                                       |                                      | aspects, in the case of a <b>MixedEventAttendanceMode</b> ).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>maximumVirtualAttendeeCapacity</b> | <b>Integer</b>                       | The maximum virtual attendee capacity of an <b>Event</b> whose <b>eventAttendanceMode</b> is <b>OnlineEventAttendanceMode</b> (or the online aspects, in the case of a <b>MixedEventAttendanceMode</b> ).                                                                                                                                                                                                                                                                                                                                                                   |
| <b>offers</b>                         | <b>Demand</b> or <b>Offer</b>        | An offer to provide this item—for example, an offer to sell a product, rent the DVD of a movie, perform a service, or give away tickets to an event. Use <b>businessFunction</b> to indicate the kind of transaction offered, i.e. sell, lease, etc. This property can also be used to describe a <b>Demand</b> . While this property is listed as expected on a number of common types, it can be used in others. In that case, using a second type, such as Product or a subtype of Product, can clarify the nature of the offer.<br>Inverse property: <b>itemOffered</b> |
| <b>organizer</b>                      | <b>Organization</b> or <b>Person</b> | An organizer of an Event.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>performer</b>                      | <b>Organization</b> or <b>Person</b> | A performer at the event—for example, a presenter, musician, musical group or actor. Supersedes <b>performers</b> .                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>previousStartDate</b>              | <b>Date</b>                          | Used in conjunction with eventStatus for rescheduled or cancelled events. This property contains the previously scheduled start date. For rescheduled events, the startDate property should be used for the                                                                                                                                                                                                                                                                                                                                                                 |

| Property                         | Expected Type                        | Description                                                                                                                                                                                                           |
|----------------------------------|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  |                                      | newly scheduled start date. In the (rare) case of an event that has been postponed and rescheduled multiple times, this field may be repeated.                                                                        |
| <b>recordedIn</b>                | <b>CreativeWork</b>                  | The CreativeWork that captured all or part of this Event.<br>Inverse property: <b>recordedAt</b>                                                                                                                      |
| <b>remainingAttendeeCapacity</b> | <b>Integer</b>                       | The number of attendee places for an event that remain unallocated.                                                                                                                                                   |
| <b>review</b>                    | <b>Review</b>                        | A review of the item. Supersedes <b>reviews</b> .                                                                                                                                                                     |
| <b>sponsor</b>                   | <b>Organization</b> or <b>Person</b> | A person or organization that supports a thing through a pledge, promise, or financial contribution. E.g. a sponsor of a Medical Study or a corporate sponsor of an event.                                            |
| <b>startDate</b>                 | <b>Date</b> or <b>DateTime</b>       | The start date and time of the item (in <b>ISO 8601 date format</b> ).                                                                                                                                                |
| <b>subEvent</b>                  | <b>Event</b>                         | An Event that is part of this event. For example, a conference event includes many presentations, each of which is a subEvent of the conference. Supersedes <b>subEvents</b> .<br>Inverse property: <b>superEvent</b> |
| <b>superEvent</b>                | <b>Event</b>                         | An event that this event is a part of. For example, a collection of individual music performances might each have a music festival as their superEvent.<br>Inverse property: <b>subEvent</b>                          |

| Property                         | Expected Type                | Description                                                                                                                                                                                                                                                                                            |
|----------------------------------|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>description</b>               | Text or TextObject           | A description of the item.                                                                                                                                                                                                                                                                             |
| <b>disambiguatingDescription</b> | Text                         | A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.                                                           |
| <b>identifier</b>                | PropertyValue or Text or URL | The identifier property represents any kind of identifier for any kind of <b>Thing</b> , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See <b>background notes</b> for more details. |
| <b>image</b>                     | ImageObject or URL           | An image of the item. This can be a <b>URL</b> or a fully described <b>ImageObject</b> .                                                                                                                                                                                                               |
| <b>mainEntityOfPage</b>          | CreativeWork or URL          | Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See <b>background notes</b> for details.<br>Inverse property: <b>mainEntity</b>                                                                                                                      |
| <b>name</b>                      | Text                         | The name of the item.                                                                                                                                                                                                                                                                                  |
| <b>potentialAction</b>           | Action                       | Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.                                                                                                                                                                                     |

| Property         | Expected Type         | Description                                                                                                                                                   |
|------------------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>sameAs</b>    | URL                   | URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website. |
| <b>subjectOf</b> | CreativeWork or Event | A CreativeWork or Event about this Thing.<br>Inverse property: <b>about</b>                                                                                   |
| <b>url</b>       | URL                   | URL of the item.                                                                                                                                              |

Instances of **PublicationEvent** may appear as a value for the following properties

| Property             | On Types     | Description                                                                 |
|----------------------|--------------|-----------------------------------------------------------------------------|
| <b>publication</b>   | CreativeWork | A publication event associated with the item.                               |
| <b>releasedEvent</b> | CreativeWork | The place and time the release was issued, expressed as a PublicationEvent. |
