

# SizeSystemEnumeration

A Schema.org Enumeration Type

*This term is in the "new" area - implementation feedback and adoption from applications and websites can help improve our definitions.*

**Thing** > **Intangible** > **Enumeration** > **SizeSystemEnumeration**

[\[more...\]](#)

Enumerates common size systems for different categories of products, for example "EN-13402" or "UK" for wearables or "Imperial" for screws.

Instances of **SizeSystemEnumeration** may appear as a value for the following properties

| Property          | On Types                 | Description                                                                                                                                                                                                                |
|-------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>sizeSystem</b> | <b>SizeSpecification</b> | The size system used to identify a product's size. Typically either a standard (for example, "GS1" or "ISO-EN13402"), country code (for example "US" or "JP"), or a measuring system (for example "Metric" or "Imperial"). |
