

# Ticket

A Schema.org Type

**Thing** › **Intangible** › **Ticket**

[\[more...\]](#)

Used to describe a ticket to an event, a flight, a bus ride, etc.

| Property                      | Expected Type                  | Description                                                                                                                                                                                                                                |
|-------------------------------|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Properties from <b>Ticket</b> |                                |                                                                                                                                                                                                                                            |
| <b>dateIssued</b>             | <b>Date</b> or <b>DateTime</b> | The date the ticket was issued.                                                                                                                                                                                                            |
| <b>issuedBy</b>               | <b>Organization</b>            | The organization issuing the item, for example a <b>Permit</b> , <b>Ticket</b> , or <b>Certification</b> .                                                                                                                                 |
| <b>priceCurrency</b>          | <b>Text</b>                    | The currency of the price, or a price component when attached to <b>PriceSpecification</b> and its subtypes.                                                                                                                               |
|                               |                                | Use standard formats: <b>ISO 4217 currency format</b> , e.g. "USD"; <b>Ticker symbol</b> for cryptocurrencies, e.g. "BTC"; well known names for <b>Local Exchange Trading Systems</b> (LETS) and other currency types, e.g. "Ithaca HOUR". |

| Property                     | Expected Type                        | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>ticketNumber</b>          | Text                                 | The unique identifier for the ticket.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>ticketToken</b>           | Text or URL                          | Reference to an asset (e.g., Barcode, QR code image or PDF) usable for entrance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>ticketedSeat</b>          | Seat                                 | The seat associated with the ticket.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>totalPrice</b>            | Number or PriceSpecification or Text | The total price for the reservation or ticket, including applicable taxes, shipping, etc.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                              |                                      | Usage guidelines: <ul style="list-style-type: none"> <li>Use values from 0123456789 (Unicode 'DIGIT ZERO' (U+0030) to 'DIGIT NINE' (U+0039)) rather than superficially similar Unicode symbols.</li> <li>Use '.' (Unicode 'FULL STOP' (U+002E)) rather than ',' to indicate a decimal point. Avoid using these symbols as a readability separator.</li> </ul>                                                                                                                                                                                                              |
| <b>underName</b>             | Organization or Person               | The person or organization the reservation or ticket is for.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Properties from <b>Thing</b> |                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>additionalType</b>        | Text or URL                          | An additional type for the item, typically used for adding more specific types from external vocabularies in microdata syntax. This is a relationship between something and a class that the thing is in. Typically the value is a URI-identified RDF class, and in this case corresponds to the use of rdf:type in RDF. Text values can be used sparingly, for cases where useful information can be added without their being an appropriate schema to reference. In the case of text values, the class label should follow the <a href="#">schema.org style guide</a> . |

| Property                         | Expected Type                | Description                                                                                                                                                                                                                                                                                            |
|----------------------------------|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>alternateName</b>             | Text                         | An alias for the item.                                                                                                                                                                                                                                                                                 |
| <b>description</b>               | Text or TextObject           | A description of the item.                                                                                                                                                                                                                                                                             |
| <b>disambiguatingDescription</b> | Text                         | A sub property of description. A short description of the item used to disambiguate from other, similar items. Information from other properties (in particular, name) may be necessary for the description to be useful for disambiguation.                                                           |
| <b>identifier</b>                | PropertyValue or Text or URL | The identifier property represents any kind of identifier for any kind of <b>Thing</b> , such as ISBNs, GTIN codes, UUIDs etc. Schema.org provides dedicated properties for representing many of these, either as textual strings or as URL (URI) links. See <b>background notes</b> for more details. |
| <b>image</b>                     | ImageObject or URL           | An image of the item. This can be a <b>URL</b> or a fully described <b>ImageObject</b> .                                                                                                                                                                                                               |
| <b>mainEntityOfPage</b>          | CreativeWork or URL          | Indicates a page (or other CreativeWork) for which this thing is the main entity being described. See <b>background notes</b> for details.<br>Inverse property: <b>mainEntity</b>                                                                                                                      |
| <b>name</b>                      | Text                         | The name of the item.                                                                                                                                                                                                                                                                                  |
| <b>potentialAction</b>           | Action                       | Indicates a potential Action, which describes an idealized action in which this thing would play an 'object' role.                                                                                                                                                                                     |
| <b>sameAs</b>                    | URL                          | URL of a reference Web page that unambiguously indicates the item's identity. E.g. the URL of the item's Wikipedia page, Wikidata entry, or official website.                                                                                                                                          |

| Property         | Expected Type                       | Description                                                                 |
|------------------|-------------------------------------|-----------------------------------------------------------------------------|
| <b>subjectOf</b> | <b>CreativeWork</b> or <b>Event</b> | A CreativeWork or Event about this Thing.<br>Inverse property: <b>about</b> |
| <b>url</b>       | <b>URL</b>                          | URL of the item.                                                            |

Instances of **Ticket** may appear as a value for the following properties

| Property              | On Types           | Description                               |
|-----------------------|--------------------|-------------------------------------------|
| <b>reservedTicket</b> | <b>Reservation</b> | A ticket associated with the reservation. |
