

Time

A Schema.org Data Type

DataType › **Time**

[\[more...\]](#)

A point in time recurring on multiple days in the form hh:mm:ss[ZI(+|-)hh:mm] (see [XML schema for details](#)).

Instances of **Time** may appear as a value for the following properties

Property	On Types	Description
arrivalTime	Trip	The expected arrival time.
availabilityEnds	ActionAccessSpecification or Demand or Offer	The end of the availability of the product or service included in the offer.
availabilityStarts	ActionAccessSpecification or Demand or Offer	The beginning of the availability of the product or service included in the offer.
checkinTime	LodgingBusiness or LodgingReservation	The earliest someone may check into a lodging establishment.

Property	On Types	Description
checkoutTime	LodgingBusiness or LodgingReservation	The latest someone may check out of a lodging establishment.
closes	OpeningHoursSpecification	The closing hour of the place or service on the given day(s) of the week.
cutoffTime	ShippingDeliveryTime	Order cutoff time allows merchants to describe the time after which they will no longer process orders received on that day. For orders processed after cutoff time, one day gets added to the delivery time estimate. This property is expected to be most typically used via the ShippingRateSettings publication pattern. The time is indicated using the ISO-8601 Time format, e.g. "23:30:00-05:00" would represent 6:30 pm Eastern Standard Time (EST) which is 5 hours behind Coordinated Universal Time (UTC).
departureTime	Trip	The expected departure time.
doorTime	Event	The time admission will commence.
endTime	Action or FoodEstablishmentReservation or InteractionCounter or MediaObject or Schedule	The endTime of something. For a reserved event or service (e.g. FoodEstablishmentReservation), the time that it is expected to end. For actions that span a period of time, when the action was performed. E.g. John wrote a book from January to <i>December</i>. For media, including audio and video, it's the time offset of the end of a clip within a larger file. Note that Event uses startDate/endDate instead of startTime/endTime, even when describing dates with times. This situation may be clarified in future revisions.
opens	OpeningHoursSpecification	The opening hour of the place or service on the given day(s) of the week.

Property	On Types	Description
startTime	Action or FoodEstablishmentReservation or InteractionCounter or MediaObject or Schedule	The startTime of something. For a reserved event or service (e.g. FoodEstablishmentReservation), the time that it is expected to start. For actions that span a period of time, when the action was performed. E.g. John wrote a book from <i>January</i> to December. For media, including audio and video, it's the time offset of the start of a clip within a larger file. Note that Event uses startDate/endDate instead of startTime/endTime, even when describing dates with times. This situation may be clarified in future revisions.
